

## Spark-Ignited Generator Set Model GGLB 60 Hz

**Natural Gas - 150 kW, 188 kVA Standby**  
**Propane - 140 kW, 175 kVA Standby**

### Description

Cummins Power Generation commercial generator sets are fully integrated power generation systems providing optimum performance, reliability, and versatility for stationary standby or prime power applications.

A primary feature is strong motor-starting capability and fast recovery from transient load changes. The torque-matched system includes a heavy-duty GM 4-cycle spark-ignited engine, an AC alternator with high motor-starting kVA capacity and an electronic voltage regulator for precise regulation under steady-state or transient loads. The GenSet accepts 100% of the nameplate standby rating in one step, in compliance with NFPA 110 Level 1 requirements.

Natural gas fuel system is standard with options available for LP vapor, LP liquid, and dual fuel.

These commercial generator sets offer user-friendly operation. The standard PowerCommand<sup>®</sup> digital electronic control is an integrated system that combines engine and alternator controls for high reliability and optimum GenSet performance, and meets NFPA110 requirements.

A wide range of options, accessories, and services are available, allowing configuration to your specific power generation needs.

Every production unit is factory tested at rated load and power factor. This testing includes demonstration of rated power and single-step rated load pickup. Cummins Power Generation manufacturing facilities are registered to ISO9001 quality standards, emphasizing our commitment to high quality in the design, manufacture, and support of our products. The generator set is CSA certified and is available as UL 2200 Listed. The PowerCommand control is UL508 Listed.

All Cummins Power Generation systems are backed by a comprehensive warranty program and supported by a worldwide network of 170 distributors and service branches to assist you with warranty, service, parts, and planned maintenance support.

### Features

- **UL Listed Generator Set** - The complete generator set assembly is available Listed to UL 2200.
- **GM Heavy-Duty Gas Engine** - Rugged 4-cycle industrial spark-ignited engine delivers reliable power, low emissions, and fast response to load changes. The electronic governor provides fast response to load changes.
- **Alternator** - Several alternator sizes offer selectable motor starting capability with low reactance 2/3 pitch winding, low waveform distortion with non-linear loads, fault clearing short-circuit capability, and class H insulation. The alternator electrical insulation system is UL 1446 recognized.
- **Control Systems** - The PowerCommand electronic control is standard equipment and provides total genset system integration, including automatic remote starting/stopping, precise frequency and voltage regulation, alarm and status message display, AmpSentry<sup>™</sup> protection, output metering, auto-shutdown at fault detection, and NFPA 110 Level 1 compliance. PowerCommand control is Listed to UL508.
- **Cooling Systems** - Standard cooling package provides reliable running at the standby and prime rating, at up to 50°C ambient temperature.
- **Integral Vibration Isolation** - Robust skid base supports the engine, alternator, and radiator on isolators, minimizing transmitted vibration.
- **E-Coat Finish** - Dual electro-deposition paint system provides high resistance to scratching, corrosion, and fading.
- **Enclosures** - Optional weather-protective and sound attenuated enclosures are available.
- **Certifications** - Generator sets are designed, manufactured, tested, and certified to relevant UL, NFPA, ISO, IEC, and CSA standards.
- **Warranty and Service** - Backed by a comprehensive warranty and worldwide distributor service network.

## Generator Set

The general specifications provide representative configuration details. Consult the outline drawing for installation design.

See outline drawing 0500-4207 for installation design specifications.

<b>Unit Width, in (mm)</b>	40.0 (1016)
<b>Unit Height, in (mm)</b>	56.0 (1422)
<b>Unit Length, in (mm)</b>	98.2 (2496)
<b>Unit Dry Weight, lb (kg)</b>	2550 (1157)
<b>Unit Wet Weight, lb (kg)</b>	2675 (1213)
<b>Rated Speed, rpm</b>	1800
<b>Voltage Regulation, No Load to Full Load</b>	±1.0%
<b>Random Voltage Variation</b>	±1.0%

Max. Static Restriction, in H <sub>2</sub> O (Pa)	0.50 (124.50)		0.50 (124.50)	

### Rating Definitions

**Standby Rating based on:** Applicable for supplying emergency power for the duration of normal power interruption. No sustained overload capability is available for this rating. (Equivalent to Fuel Stop Power in accordance with ISO3046, AS2789, DIN6271 and BS5514). Nominally rated.

**Prime (Unlimited Running Time) Rating based on:** Applicable for supplying power in lieu of commercially purchased power. Prime power is the maximum power available at a variable load for an unlimited number of hours. A 10% overload capability is available for limited time. (Equivalent to Prime Power in accordance with ISO8528 and Overload Power in accordance with ISO3046, AS2789, DIN6271, and BS5514). This rating is not applicable to all generator set models.

**Base Load (Continuous) Rating based on:** Applicable for supplying power continuously to a constant load up to the full output rating for unlimited hours. No sustained overload capability is available for this rating. Consult authorized distributor for rating. (Equivalent to Continuous Power in accordance with ISO8528, ISO3046, AS2789, DIN6271, and BS5514). This rating is not applicable to all generator set models.

### Site Derating Factors

#### Natural Gas

Engine power available up to 1950 ft (594 m) at ambient temperatures up to 104°F (40°C). Above 1950 ft (594 m) derate at 4% per 1000 ft (305 m), and 1% per 10°F (2% per 11°C) above 104°F (40°C).

#### Propane

Engine power available up to 1000 ft (305 m) at ambient temperatures up to 77°F (25°C). Above 1000 ft (305 m) derate at 4% per 1000 ft (305 m), and 1% per 10°F (2% per 11°C) above 77°F (25°C).

# Engine

Rugged GM spark-ignited engines are designed to operate efficiently on gaseous fuels.

Electronic governing is standard, providing precise speed regulation especially useful for applications requiring constant (isochronous) frequency regulation such as Uninterruptible Power Supply (UPS) systems, non-linear loads, or sensitive electronic loads. Coolant heaters are required for all emergency standby installations or for any application requiring fast load acceptance after start-up.

## Specifications – Engine

<b>Base Engine</b>	GM8.1L-HO, Turbocharged and CAC
<b>Displacement in<sup>3</sup> (L)</b>	496.0 (8.1)
<b>Overspeed Limit, rpm</b>	2400 ±50
<b>Regenerative Power, kW</b>	15.00
<b>Cylinder Block Configuration</b>	Cast iron, V 8 cylinder
<b>Battery Capacity</b>	300 amps minimum at ambient temperature of 32°F (0°C)
<b>Battery Charging Alternator</b>	70 amps
<b>Starting Voltage</b>	12-volt, negative ground
<b>Lube Oil Filter Types</b>	Single spin-on canister-combination full flow with bypass
<b>Standard Cooling System</b>	122°F (50°C) ambient radiator cooling system
<b>Standard Fuel</b>	Natural gas is standard.

Power Output	Natural Gas		Propane				
	Standby	Prime	Standby	Prime

## Alternator

Several alternators are available for application flexibility based on the required motor-starting kVA and other requirements. Larger alternator sizes have lower temperature rise for longer life of the alternator insulation system. In addition, larger alternator sizes can provide a cost-effective use of engine power in across-the-line motor-starting applications and can be used to minimize voltage waveform distortion caused by non-linear loads.

Single-bearing alternators couple directly to the engine flywheel with flexible discs for drivetrain reliability and durability. No gear reducers or speed changers are used. Two-thirds pitch windings eliminate third-order harmonic content of the AC voltage waveform. The standard excitation system is a PMG excited system.

### Alternator Application Notes

**Shunt or Separately Excited (PMG) System** - Standard generator set utilizes a single phase sensing electronic voltage regulator to provide excitation control. Permanent Magnet Generator (PMG) units are provided with an integral PMG to supply power to the voltage regulator. PMG excitation control is via the PowerCommand Control, which provides a 3-phase sensing voltage regulation system. A PMG system generally has better motor-starting performance, lower voltage dip upon load application, and better immunity from problems with harmonics in the main alternator output induced by non-linear loads.

**Alternator Sizes** - On any given model, various alternator sizes are available to meet individual application needs. Alternator sizes are differentiated by maximum winding temperature rise, at the generator set standby or prime rating, when operated in a 40°C ambient environment. Available temperature rises range from 80°C to 150°C. Not all temperature rise selections are available on all models. Lower temperature rise is accomplished using larger alternators at lower current density. Lower temperature rise alternators have higher motor-starting kVA, lower voltage dip upon load application, and they are generally recommended to limit voltage distortion and heating due to harmonics induced by non-linear loads.

**Alternator Space Heater** - is recommended to inhibit condensation in outdoor environments.

### Available Output Voltages

## Generator Set Options

### Engine

- 120 V, 1500 W coolant heater
- 240V, 1500 W coolant heater

### Fuel System

- LP Vapor
- LP Liquid
- Natural Gas/LP Vapor with automatic changeover
- Natural Gas/LP Liquid with automatic changeover

### Alternator

- 105°C rise alternator
- 125°C rise alternator
- 120/240 V, 100 W alternator anti-condensation heater
- 12-lead broad range extended stack (full single phase output)
- Single phase (4-lead)
- PMG excitation

### Exhaust System

- Mounted residential grade silencer (unhoused)
- Exhaust flex (muffler to customer connection)

### Enclosures

- Weather-protective enclosure with silencer
- Quiet Site Level 1 enclosure with silencer
- Quiet Site Level 2 enclosure with silencer

### Generator Set

- AC entrance box
- Battery
- Battery charger
- Export box packaging
- UL 2200 Listed
- Main line circuit breakers
- Remote annunciator panel
- Spring isolators
- 5 year comprehensive warranty
- 2 year standby warranty
- 5 year basic power warranty

## Accessories and Services

A wide range of products and services is available to match your power generation system requirements. Cummins Onan products and services include:

- Diesel and Spark-Ignited Generator Sets
- Transfer Switches
- Bypass Switches
- Parallel Load Transfer Equipment
- Digital Paralleling Switchgear
- PowerCommand Network and Software
- Distributor Application Support
- Planned Maintenance Agreements

## Warranty

All components and subsystems are covered by an express limited one-year warranty. Other optional and extended factory warranties and local distributor maintenance agreements are available. Contact your distributor/dealer for more information.

## Certifications

**ISO9001** - This generator set was designed and manufactured in facilities certified to ISO9001.

**CSA** - This generator set is CSA certified to product class 4215-01.

**PTS** - The Prototype Test Support (PTS) program verifies the performance integrity of the generator set design. Products bearing the PTS symbol have been subjected to demanding tests in accordance to NFPA 110 Level 1 to verify the design integrity and performance under both normal and abnormal operating conditions including short circuit, endurance, temperature rise, torsional vibration, and transient response, including full load pickup.

**UL** - The generator set is available Listed to UL 2200, Stationary Engine Generator Assemblies. The PowerCommand control is Listed to UL 508 - Category NITW7 for U.S. and Canadian usage.

**See your distributor for more information**
